SEPTEMBER 28th 2017 Monaco Yacht Show 2017

Press Release

NEW OPENING 2018 - La Seyne-Toulon

Monaco Marine is very proud to announce the opening of its seven shipyard on the French Riviera. A Yacht facility of a 40 000sqm ground area and a 14 645 sqm water area will open at La Seyne-Toulon on the second semester of 2018 after the end of its construction. This new shipyard dedicated to super yachts will include a lifting tool capacity of 500 tons for yachts up to 55m. A specially built slipway will also assist the hauling out and launching of large multi-hulls. This site will include a covered shed to enable any demanding activities requiring humidity and climate control for the highest quality standards asked by international customers.

Super Yachts Facility

This shipyard will be unique on the French Riviera as it has the capacity to welcome as many as 28 yachts ashore and afloat in the same time. Industrial tools to operate on super yachts must be at the state of the art to ensure the best efficiency regarding quality, delivery times and cost. This is why Monaco Marine invest 15 Million € at la Seyne-Toulon Yacht facility.

Mega Yacht Development

Monaco Marine and La Seyne-Toulon wish to go further in the development of a yachting sector. We are already looking forward to propose much more services and a wider scope of yachts to be refitted. Therefore a public occupation authorization (AOT) has already been given to Monaco Marine to pursue its investment on the site and them to operate on Mega Yachts up to 140m for 2019.

Sustainability

Monaco Marine became in 22 years one of the key player as a maintenance and refit shipyard. To achieve this goal, Monaco Marine had always put sustainability in its DNA.

- Sustainability of the company thanks to its industrial investment policy, its recognized know-how around the world and its very good performance on the market.
- Sustainability on economical activity thanks to its subcontractor policy guaranteeing them a continuous and regular flow of orders and the use of the best tools to accomplish their missions.
- Sustainability on the know-how and workers' skills thanks to strong learning and empowerment internal programs.
- Sustainability of public policies thanks to a close and strong cooperation with local actors involved in the development of the territories.
- Sustainability regarding the environment thanks to an HSE policy allowing us to guarantee zero untreated discharge into the natural environment
